Achieving  
the  
Impossible  
Dream

Swiss watchmaking  
Tradition

# A message from Pascal Berclaz

The idea of designing a completely transparent watch has occupied the greatest minds in the watchmaking profession for more than 100 years. All attempts to achieve the dream of seeing the hands of time floating on wrists failed and everybody remained convinced it was impossible to realize. That is why I can say with pride that the Quinting manufacture leapt into a new era in watchmaking history by making this dream come true.

Five engineers pooled their knowledge; millions of dollars were invested throughout 7 years of research and development. The result was that we managed to craft the first and only 100% transparent chronograph in the world. We were able to create our own identity as a manufacturer, that is impossible to imitate or to copy.

As true luxury objects, Quinting watches appeal to dreamers who are not looking for what they need but for what they desire. Besides providing highly innovative and exceptional products, we provide a mystery, the mystery of transparency, the mystery of Quinting.

And now I present to you our Art Collection, please enjoy.

A handwritten signature in blue ink, appearing to be 'P. Berclaz', written over a faint background of watch gears.

Pascal Berclaz  
President and CEO of Quinting SA

# Quinting's Art

Quinting introduces you to its Art Collection,  
one that consists solely of unique pieces.

Quinting's 100% transparent watches with a layered sapphire movement are a blank canvas for original art. With our artists' skills and creativity we were able to create hand-painted, stunning one-of-a-kind pieces.

Enamel used on Quinting watches provides a different effect than when used on any other. Our watches have internal discs made of sapphire, as eternal as diamonds. The paintings last forever, similar to stained glass one may find in the oldest cathedrals, but all the more durable.

Each unique watch frames an original work of art. The paintings were made using the finest materials. A steady hand, a special paint brush and high quality enamel paint give a colorful new life to these Quinting watches.

The following watches are what is possible when  
Quinting's artists put their imaginations and talent to  
work

The Cherry Blossom

The Moonlight

The Koifish

The Polo Player

Collection

The Cherry Blossom

# The Cherry Blossom

Two animated birds fly around a cherry blossom in bloom.

These exotic birds naturally find their place in paradise on earth among the beautiful blossoms of a cherry tree.

Within Asian culture cherry blossoms represent feminine power and beauty. Wearing this watch enforces the embodiment of these traits.

# Watchmaking Revolution

Quinting continues to WOW the watch making community with firsts: the first and only transparent watch, the first and only watch with a sapphire movement, the first and only watch with counterbalancing forces. Now Quinting releases yet another first: The Moonlight.

Quinting created a movement exclusively for this watch, the only "true" moon phase watch. It is the first in the world where the moon revolves around the earth, accurately showing its phases. Meanwhile, every hour a comet shoots around the earth and the moon, always ready to be wished upon.

This limited edition is composed of 360 unique pieces, representing the 360 degrees of the earth. Each piece will have a different view of the earth, painted by hand with enamel.

## The Moonlight

The Koifish

# The Koifish

Five bright Koi fish lively swim around this watch. Koi are willful fish that swim upstream, they are even said to climb waterfalls.

Perseverance, determination, and power drive the one who wears this watch to greatness. In this watch, these fish never stop swimming, moving forward with the passage of time.

# The Polo Player

Polo is the sport of royalty. Players gallop on majestic horses to get to the goal and achieve victory.

The Polo Player is the first timepiece we used our custom-made phosphorescent pigment on. This first, created especially by Quinting, is the fruit of an advanced study. The result is a luminescent masterpiece that perpetually glows.

Within this watch the mallet turns at the speed of the minute hand, enabling the polo player to race through time and hit the rolling ball once an hour. In light or in darkness, the polo spirit radiates within this watch.

The Polo  
Player

### Movement Quinting Tech Moonlight

- The unique transparent movement is made of sapphire.
- The unique Swiss movement is patented.
- Composed of 8 perfectly parallel sapphire discs with an anti-reflection coating
- Diameter: 39,00 mm
- Height: 8,60 mm
- Guarantee: 2 years

### Case

- Stainless Steel
- Round Bezel
- Total Diameter: 43,80 mm
- Total Height: 14,00 mm
- Water Resistant: 50 meters (5 ATM)

### Time Features

- Hour Hand
- Minute Hand
- Moon phase

### Position of paintings

- Moon on lunar phase sapphire
- Shooting star on minute sapphire
- Earth on intermediate fixed sapphire

### Movement Quinting Tech 5

- The unique transparent movement is made of sapphire.
- The unique Swiss movement is patented.
- Composed of 7 perfectly parallel sapphire discs with an anti-reflection coating
- Diameter: 39,00 mm
- Height: 8,60 mm
- Guarantee: 2 years

### Case

- Stainless Steel
- Round Bezel
