A message from Pascal Berclaz

The idea of designing a completely transparent watch has occupied the greatest minds in the watchmaking profession for more than 100 years. All attempts to achieve the dream of seeing the hands of time floating on wrists failed and everybody remained convinced it was impossible to realize. That is why I can say with pride that the Quinting manufacture leapt into a new era in watchmaking history by making this dream come true.

Five engineers pooled their knowledge; millions of dollars were invested throughout 7 years of research and development. The result was that we managed to craft the first and only 100% transparent chronograph in the world. We were able to create our own identity as a manufacturer, that is impossible to imitate or to copy.

As true luxury objects, Quinting watches appeal to dreamers who are not looking for what they need but for what they desire. Besides providing highly innovative and exceptional products, we provide a mystery, the mystery of transparency, the mystery of Quinting.

Pascal Berclaz
President and CEO of Quinting SA

The Mystery of Quinting

If it could be described as a sound it would be that of a champagne cork popping opened to celebrate a new era in the watch making art. If it could be described as a place it would be a magical and mysterious garden, transparent and visible at the same time. Quinting watches are state-of-the-art timepieces in both design and technology; they are unique and entirely transparent.

Through the ages, conquests of transparency still remain a privilege of great fascination where the magic of crystalline luminosity and pure reflections exert over men an extraordinary power of seduction.

For over a century the greatest minds of the watch making profession looked at ways of making a completely transparent watch, but without success. Yet, complete transparency was achieved on few clocks. At the beginning of the 19th century Jean-Eugène Robert Houdin, the French clockmaker and performer widely considered the father of modern magic, made what we call today “the mysterious” clock. When observing it one could only see the hands on a totally see-through dial made of glass.

Later other mystery clocks were made by Cartier and LeCoultre but up to now nobody succeeded in creating a completely transparent wrist-watch. Until now Swiss watch manufacturers were convinced that it was impossible to give shape to this marvel of horology. But nothing is impossible, especially for creative minds. At the Swiss watch manufacture Quinting, this outstanding conception saw the light of day. No movement or mechanism is visible with the movement of the hands. Everything seems to be mysterious. This is the mystery of Quinting.

When Ambition

...

In 1993, five excellent Swiss engineers fascinated by the world of hands and wheels decided to embark on the most extreme adventure ever seen in the watch-making world: to create a completely transparent chronograph.

A young engineer from the automotive sector who dreamt of a watch with the hands suspended in air set about achieving his goal. After the long-time search of engineers able to develop this watch's concept, he found four highly skilled engineers that could make the dream a reality. Together they managed to make a functioning prototype that was immediately honoured with the prestigious, "Prix Officiel de la Revue des Montres." Nevertheless, to share their exceptional invention with the rest of the world they needed to start the process of manufacturing. Pascal Berclaz, the electromechanical research engineer of the team of five engineers, is also an accomplished economist. Thanks to him, and the fruit of their seven years of research, development and testing, the first Mystery Transparent Quinting Chronograph was unveiled to the world in 2000.

Today, under the current leadership of President Pascal Berclaz, Quinting watches are earning a distinguished reputation throughout the watch making industry and challenging the most prestigious brand names. Quinting is the first watch in the world that is entirely transparent from the dial to the case back. For the first time in the history of watch-making, the mechanism erases itself to make way for transparency and light, giving the impression that the hands are floating in air.

...

Meets Passion

Our values are passion, innovation and challenge. That is what sets us apart and defines us. Quinting created a watch that highlights the technical prowess, supreme quality and craftsmanship of its watch making team. In a relatively short time Quinting has made a very successful incursion into the world of quality timepieces offering watches that are both unique and technically advanced. Each timepiece is meticulously crafted by a team of innovative and talented engineers and master watch makers. Quinting watches are created with the latest technology, but the ultimate tools are the skilled hands of our accomplished watch makers. Apart from impeccable watch making craftsmanship we are constantly searching to achieve aesthetic perfection. Quinting watches are not ordinary products but works of art designed to last a long time and accompany each watch lover through time.

Quinting is part of the restricted watch maker's circle that has been able to develop its own movement. The movement Quinting is made by superposing several thin toothed discs of sapphire previously metallised and given an antireflection coating. It is with this very complicated system of stationary and moving sapphires that the hands run.

With the exception of 7 parts, including the hands, all the components of Quinting chronograph, numbering 230 and 26 sub-assemblies are manufactured exclusively for Quinting. The watches are assembled by hand at the Manufacture in St. Blaise, near Neuchâtel in Switzerland. The extremely delicate operation is performed in a white room (dust free) to ensure perfect transparency. The movement becomes totally transparent, because the mechanism is in sapphire. This advanced technique however requires a high degree of precision and knowledge, placing Quinting watches among the most sophisticated and complex on the market.

The Dove of Geneva Peace Watchmaking

Today Quinting throws a challenge to wars and terrorism by creating the Dove of Geneva. A watch symbolizing that the only thing anyone should fight for is peace and democracy's job is to spread the message of peace around the world and unite peace states. Combining high quality workmanship and peacemaking initiative, Quinting wants to do its bit to promote peace around the world beginning with the man who wears Quinting for peace.

“The only thing anyone should fight for is Peace” (Pascal Berclaz)

First symbol

Peace is the only thing that is worth working at for 59 minutes to have one minute of peace per hour. It is for this reason that we have put two doves in the watch, one turning at the speed of the minute hand and the other at the speed of the hour hand. These doves fight for 59 minutes to become perfectly superposed for only one minute of every hour thus symbolizing Peace.

Second symbol

Peace is the work of democracies. We have created this watch in a limited collection of 192 unique pieces, equal to the number of countries in the UN. This represents for each country in the UN that there is only ONE in the world, and only one exists. On each watch casing is a number which references the date of the entry of a country into the UN.

Third symbol

When we look at this transparent watch, through the first symbol, we can see the person who wears the watch. The transparency of this watch symbolizes that the person who wears it is the actor of peace but not the symbols or principles. This piece will be a daily reminder of these symbols to the one who wears it and that he or she can be the builder of a better humanity.

QSL51P

Characteristics

The watch is made of metalized sapphires with an anti-reflection treatment. The case and the transparent sapphire movement are engraved with an individual series number. Only one chronograph per country belonging to the United Nations has been created for this limited edition. On the side of each case is an engraving with the number of a country corresponding to the United Nations list.

Case

Total Height:	14,00	mm
Total Diameter:	43,80	mm
Water Resist.:	50,00	meters (5 ATM)

Movement

The unique transparent Swiss movement is patented.

Diameter:	39,00	mm
Total Height:	8,60	mm
Guarantee:	2,00	years
Number of sapphire layers: 13 sapphire discs perfectly parallel		

Functions/Display

Hours, Minutes, Date/AM - PM Indication

The chronograph has 3 little dials with seconds, minutes and hours timer.

Seconds Timer	at	12
Minutes Timer	at	6
Hours Timer	at	9

Ambassadors Fighting for Peace

Bill Clinton
Former Pdt of the USA

When Bill Clinton went to Tokyo, he went to Douze, one of the jewelry boutiques where Quinting is found in Japan. Once there he sought out the Dove of Geneva.

"The use of force and intelligence are not inevitably exclusive one of the other" (Bill Clinton)

He is now wearing the Dove of Geneva n° 001, the USA piece.

Maurice Leuenberger
Former Pdt of Switzerland

Moritz Leuenberger was first a lawyer and a member of the Swiss socialist party. He was also a member of the Swiss Federal Council from 1995 to 2010 as a representative of the Social Democratic Party (SPS/ PSS).

He was elected President of Switzerland in 2001 and 2006. After his election, he retook the Federal Department of the Environment, transports, energy and communication.

Samuel Schmid
Former Pdt of Switzerland

On June 5th 2006, Samuel Schmid (President of Switzerland in 2005) was given the Dove of Geneva by Quinting's president, Pascal Berclaz. This was a gift from the UN's ambassador club of Geneva.

In front of more than 500 people, Samuel Schmid was honored to promote Peace with the Dove of Geneva like Pascal Couchepin and Joseph Deiss.

Joseph Deiss
Former Pdt of the UN

On December 14th 2009, Joseph Deiss was designated the future president of the 65th session of the General assembly of the United Nations. His official debut was September 14th 2010.

The CEO's club of Geneva offered the famous Quinting chronograph "The Dove of Geneva" to the Swiss President, Joseph Deiss in November 2004.

Pascal Couchepin
Former Pdt of Switzerland

Pascal Couchepin was elected as President of Switzerland in 2003 and 2008. He is also a former member of the Swiss Federal Council (1998 - 2009).

On the September 29th 2003, he was given the famous Dove of Geneva by Quinting's President Pascal Berclaz. This prestigious gift was presented by the UN ambassador club from Geneva.

Abdelaziz Bouteflika
Pdt of Algeria

The Algerian President succeeded in re-establishing civil peace and security in his country.

Quinting's Dove of Geneva, peace symbol par excellence, was offered to him by the Swiss-Algerian Chamber of Commerce and Industry during the opening of the Swiss stand of the 38th Algerian International Fair, which is the most important annual economic event in Algeria.

Kofi Annan
7th Secretary General of UN

The prestigious World Organization for Peace (WOFP), whose members include note-worthy personalities like Bill Clinton and Nelson Mandela, chose Quinting to reward Kofi Annan's commitment to the fight for Peace in the world.

Kofi Annan, Secretary General of the United Nations (from 1997 to 2006) and Nobel Peace Prize winner, is a distinctive dignitary of the peace.

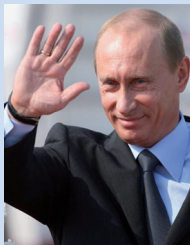

Kateryna Yushchenko
Ukraine's First Lady

Kateryna Yushchenko is the wife of former President of Ukraine Viktor Yushchenko.

As the former special assistant to the Assistant Secretary of State for Human Rights and Humanitarian Affairs, she was touched by Quinting's fight for peace.

She used to work in the White House and is now involved in charity.

Vladimir Putin
Pdt of Russia

Vladimir Putin, one of the most popular men in Eastern Europe, was President of Russia from 2000 to 2008. He was also Prime Minister from 1999 to 2000 and from 2008 to 2012.

He is currently once again President of Russia and recommended Quinting in one of the most famous Russian business magazines, as a symbol of peace.

**Sheikh Khalifa bin
Salman Al Khalifa**
Prime Minister of Bahrain

During Bahrain's International Fair, 6 Dove of Geneva chronographs, intended for the 6 countries of Middle East that are part of the United Nations, were showcased in the middle of central alley of Hall 1.

The 6 countries and their numbers are the following: Saudi Arabia (18), Kuwait (113), Bahrain (129), Qatar (131), Oman (132), and the United Arab Emirates (133).

**Esfandiar Rahim
Mashaei**
Former Vice Pdt of Iran

Multi-faceted man, Esfandiar Rahim Mashaei was all at once Head of Cultural Heritage and Tourism Organization (2005 - 2009), First Vice President of Iran (2009) and Head of the Presidential Center (2009 - 2011).

He is now the Chief of Staff of the President of Iran and is closely related to the actual President Mahmoud Ahmadinejad.

Henri Proglio
EDF's CEO

Born in Antibes, France, of Italian origins, Henri Proglio is one of the most important figures of management in the Environment sector.

Chairman and CEO of the Compagnie Générale des Eaux since 1990, he became in 1999 Chairman and CEO of Veolia Water and then Chairman of Veolia Environment in 2000. He is now Chairman and CEO of Électricité de France (EDF).

Ambassadors from Arts and Sports

Sepp Blatter
Pdt of FIFA

In June 2010, Mr. Sepp Blatter, president of FIFA, became an owner of a Quinting watch. This man, who possesses absolute power in the world of football, chose a strong symbol to launch the World Cup: The Dove of Football.

Under the presidency of Mr. Blatter, FIFA defined its priorities: to develop governance and propose transparency in the world of football.

Christophe Soumillon
Jockey, Belgium

Absolute record holder of the horse races won in France in the same season (226, in 2005), Christophe is one of the rare jockeys with more than 1'000 victories in France.

Married since 2006 to Sophie Thalmann, Miss France 1998, he is one of the greatest jockeys still in competition, with notable victories in Dubai, Vincennes or Japan amongst others.

Tina Kandelaki
TV Star, Russia

Born in Georgia, Tina wears now different hats in Russia, particularly journalist, TV and radio presenter or producer. She notably graduated from the Foreign Affairs Department of the Russian State University for the Humanities in 2008.

Woman of medias she is also the co-owner of Apostol Media Group, a diversified media company offering PR services and TV-programs.

Eric Legrix
Jockey, France

International competitor, this French jockey used to live in Hong Kong. He won many high-level races such as the Queen Elizabeth II Cup, the Lonchamp Group 1 flat horse race "Prix du Cadran", the North-American Breeders' Cup Team or the Hong Kong Derby.

He is now using his high technical skills as a totally special and high-qualified trainer.

Michelle Ye
Movie Star, Hong Kong

Originally from China, Michelle Ye Xuan is a Hong Kong actress raised in USA until age of ten. She won Miss China International title in 1999, representing New York. Then began her actress career with more than fifty TV and cinema productions.

She recently won a Hong Kong Film Awards for Best Supporting Actress and started her own production society.

Roger Clemens
Pitcher, USA

Roger Clemens is one of the greatest pitchers in the History of American baseball. He totalizes 354 victories in Major League Baseball, what is the best result since 1950.

From the Boston Red Sox to the Yankees, he won seven Cy Young Awards, the AL Most Valuable Player Award, the All-Star Game MVP Award in 1986 and the World Series titles with the Yankees in 1999 and 2000.

Gérard Depardieu
Actor, France

With more than 100 cinema-productions directed with the biggest names of cinema such as Marguerite Duras, François Truffaut or Ridley Scott, Gérard Depardieu is certainly one of the biggest actors Europe never had.

He was recognized for his work with numerous awards such as two Césars for Best Actor, one Golden Globe or one Cannes Film Festival.

Panzetta Girolamo
TV Star, Japan

TV Star, essayist, author, voice actor, man of fashion; this Italian native lives and works for a while in Japan. Trained architect, he moved to Japan in 1986 and operated to popularize authentic Italian cuisine there.

Stepchild of a Fukushima native he is fighting since 2011 tsunami and quake to help the areas hit by the disaster. He never hesitates to appeal for donations when needed.

Mario Cipollini
Cyclist, Italy

World Road Race Championship winner in 2002, Mario Cipollini is one of the big names of Italian cyclism, thanks to his sprinter skills earning him to win a good number of stages on Tour de France or Giro.

He is now retired from sport but doesn't forget cycling. He amongst others created his own bike frames brand and is a casual consultant for the British Team Vini Santini.

Miguel Fluxa
Pdt of Iberostar

Miguel Fluxa, a man of exception, carries in his genes the elegance of luxury.

This man, with his Quinting watch, created and opened more than 100 luxury hotels, among which are some of the best in the world.

But it is the intelligence and kindness in this man that gives him a heart of gold.

Dmitri Malikov
Rock Star, Russia

Dmitri Malikov is a Russian producer, pianist, composer and singer. Born in Moscow, he draws artistic influences from his parents, as his mother was a dancer and his father a musician.

He notably proved his talent winning high-recognized awards: Meritorious Artist of Russia (1999), World Music Award (1995), People's Gold Grammmophones (1996-1999) and Hundred-Percent Hits (1998-2000).

Mysterious Chronograph

This extraordinarily extravagant chronograph escapes from the classical criteria of appreciation and is considered as the reference for the new generation. Mysterious Quinting is a masterpiece of precision, made of noble and precious materials. Pure and essential, this is a watch that will last. This object of beauty and perfection, and technical and aesthetic innovation does not go unobserved and arouses an irresistible urge to touch and possess. Beautiful and exclusive, this is a watch for someone who wants to be talked about.

The chronograph contains 11 layers of sapphire. As the whole watch houses a total of 6 hands (hours, minutes, dates, chronograph hours, chronograph minutes and chronograph seconds), there are 6 mobile sapphire discs, the other 5 are stationary.

The large case puts Quinting Mysterious Chronograph right in step with the current trend for oversized watches. Quinting is eye-catching and easily recognizable not only because of its large form, bold design and originality, but also because it has class and a timeless appearance. With its distinctive look and uncompromising Swiss quality, this is one of the most exceptional chronographs in the world that expresses originality and offers its wearer a unique personality.

Cyclone Transparency

In 2004, after 4 years of additional research and development, the Quinting manufacture revolutionized once again the watch-making industry by launching the 3-hand (hours, minutes and seconds) transparent watch. This quality fashionable watch that captivates by its creative beauty and singularity is addressed to sophisticated, self-confident and stylish men and women that treat watches as defining personal style objects and not as simple timekeepers.

This time-only model features a new patented movement: the Cyclone. The Cyclone is Quinting's answer to Abraham-Louis Breguet's Tourbillon. The Cyclone was created to counterbalance forces of gravity and synergy based on brusque movements of the wrist, whereas the tourbillon compensated the effects of gravity for pocket watches. This is the first movement in the world with counter balancing forces invented for the second hand. The watch is composed of 186 parts and houses: 9 perfectly parallel sapphire layers, 4 (hour, minute, second, and false seconds) of which are mobile.

The transparency watch, as see-through and revolutionary as the Quinting Mysterious Chronograph, is available in both men's and women's models. Despite having a diameter slightly smaller than the Mysterious Chronograph, it respects the form of its elder and shows its luminous transparency, uniquely Quinting. Creative, audacious, flamboyant, and perfectly aesthetic, the Transparency catches the imagination of both aficionados and connoisseurs looking for something unique.

Mysterious Quardinal

Sumptuous and pure as a ray of light, “The Mysterious Quardinal” that Quinting launched is a watch with a jewel as the movement. Sapphire which is the hardest and most precious stone next to the diamond was transformed by Quinting into a very complicated and thus mysterious mechanism that makes time move smoothly and transparently as the movement of the new Quinting watch “The Mysterious Quardinal.”

Majestic and enigmatic, this timepiece houses a completely transparent movement made of sapphire, the sacred gemstone, symbol of wise rulers and the divine. It was worn only by kings and high-ranking priests such as popes and cardinals. It is believed that the Ten Commandments were carved in sapphire. The movement of “The Mysterious Quardinal” is made by superposing seven thin toothed discs of sapphire previously metallised and given an antireflection coating. This complicated system is composed of 3 stationary and 4 rotating sapphire discs that put in motion the hour, minute, and date hands as well as the small second at 6 o'clock.

A Quinting watch is the only timepiece in the world that could achieve the highest degree of luxury in the watch manufacturing. Unlike others, even the most prestigious watches in the world that have metal movements, this miracle of transparency features a jewelry movement completely crafted of sapphire. “The Mysterious Quardinal” is the embodiment of the majestic splendour that surrounded mysterious cardinals who were often more influential than their kings.

The magic of sapphire is the key to the functionality of the unique invisible movement of “The Mysterious Quardinal.”

Mystic

Quinting watches possess the mystical power of attraction. With the same dimensions as Quinting “Mysterious,” “Mystic” is Quinting’s two hand model. The hour and minute hands seem to float on the wearer’s wrist, as if suspended by magic.

Quinting watches do not show their complexity. Their mysterious clockwork movement is the fruit of more than 170 components all manufactured exclusively for Quinting. Seven sapphire discs specially plated and treated with an antireflective coating give the dial its perfect transparency. This complex watch emerges from an entirely “mysterious” fabrication technology that is unique to the world.

The Dove of Geneva The Watch of Presidents

Today Quinting throws a challenge to wars and terrorism by creating the Dove of Geneva. A watch symbolizing that the only thing we should fight for is peace and democracy's job is to spread the message of peace around the world and unite peace states.

Combining high quality workmanship and peacemaking initiative, Quinting wants to do its bit to promote peace around the world beginning with the man who wears Quinting for peace.

The Dove of Geneva is a limited edition of 192 unique chronographs from Quinting. It is a QSL51 model (Stainless Steel, White Dial, Round Bezel) with one dove engraved on the minute sapphire disc, one dove engraved on the hour sapphire disc that superpose once every hour.

The Lady Dove Exquisite and Feminine

Behind every great man, is a great woman, therefore, after the success of the Quinting chronograph “The Dove of Geneva,” a chronograph watch worn by presidents aiming for peace, Quinting has launched a limited edition for women: “The Lady Dove.” It has been released with the same number of timepieces as the men’s version, 192, corresponding to the number of member countries of the UN. The “Lady Dove” is a truly feminine and exquisite watch. Two white doves “fly” inside of the transparent sapphire movement of the watch made of stainless steel with a diamond bezel. The two doves superpose for one minute every hour. The white dove on the sapphire disc of the minute hand represents every waking minute of her life, raising her children and/or working for a better future. The dove on the hour sapphire disc symbolizes that whether mother, caregiver, lawyer, poet, scientist or president, women play a major part in building and promoting peace, within their society, every hour of their lives.

The Dove of Football Fairplay Spirit

The limited edition “Dove of Football” was inspired by the “Dove of Geneva” and the 2010 FIFA World Cup. A Mysterious Quardinal in a limited edition of 192 pieces, one for every country in the UN. There is a dove engraved on the minute sapphire disc, and one on the hour sapphire disc, and a football engraved on the base immobile sapphire disc. The doves become one for one minute every hour. In this limited edition, these doves, symbols of peace, represent fair play, necessary in all games. Football is the most popular sport in the world and is an instrument of peace and fair play that reaches out to the world and touches it. Through the doves we see the football and due to the transparency, the man who wears the watch, creating a link between men. Sepp Blatter, FIFA's President, is one of the proud owners of Quinting's Dove of Football.

Ferrari Challenge Fairplay Spirit

Quinting's mission was to create a watch that supported all the constraints imposed by a race car. Our watch makers succeeded in this task. There are two Ferraris engraved on sapphire discs in the watch's movement. This limited edition is composed of 60 pieces. This number represents the number of minutes in an hour. A number between 1 and 60 is engraved on each case. If the number 1 is engraved, that shows that 1 minute past every hour the two Ferraris will become one (1h01, 2h01, 3h01, etc.).

24 Hours of Le Mans Endurance Racing

The 17 June 2006, Quinting reach a new milestone in his worldwide brand awareness campaign. In Le Mans, France, during the mythical 24 hours car race, the first ever Swiss car sponsored by Quinting did participate to this endurance race. For a first participation, the three Swiss pilots did show their talent.

The media coverage of this event is estimated an average of 228 000 000 TV viewers. The broadcast on TV is more than 108 hours in 100 countries. This race car gather 230 000 visitors and more than 1000 reporters.

Ghost Fantom Watch

In the world of horology, « skeletal » watches reveal the mechanism of their movement. Therefore, in 2011 Quinting created the watch “The Ghost”, because the essence of its transparent movement doesn’t have a skeleton. The “Ghost” illustrates the essence of the mystery of Quinting: being invisible but still present.

The ghost that floats mysteriously at the speed of the minutes in this watch is a wink at the vehicle of excellence that influenced the conception of Quinting watches. This time-piece is equipped with a tachometer for those passionate in car racing and is ornamented with diamonds and a ruby on the crown for lovers of luxury.

The Jolly Roger Skull and Crossbones

The “Golden Age of Piracy” is our second limited edition composed of The “Pirate” edition and 40 three-hand watches names “The Jolly Roger”. These collectable and unique watches are intended for present-day desperados striving for adventures whose natural temperament is rebellion and an ineradicable sense of freedom. Every age must have its own pirates and rebels, audacious and restless, breaking stereotypes and moving ahead.

Piracy has existed in one way or another since man has been traveling by sea. Its history goes back more than 3000 years. One of the first records of piracy was in Homer’s “Odyssey.” But despite its long history, only a short period stands out in the popular imagination as the classic era of Piracy. This period is known as the Golden Age of Piracy, a brief but brilliant era between 1690 and 1730, it lasted 40 years and became the most prosperous era in piracy. This is the time period where we find the well known pirates, living legends in their time. Characters such as Blackbeard, Henry Morgan, and Captain Kidd, seem larger than life and have become current names. Their history has influenced many writers and artists. During the same period “The Jolly Roger,” the pirate flag with a skull and crossbones, the definitive symbol of pirates, appeared for the first time in maritime history.

The Sea Devil

Golden Age of Piracy

The “Sea Devil” is a limited edition composed of 60 chronographs named “The Sea Devil”. These unique watches are intended for today’s desperados who are on the hunt for adventure, with a natural temperament of rebellion and a sense of tenacity and freedom.

The romantic view of piracy is in tandem with a demonic cruelty. These sea devils forged their characters in battle to survive, like lions, and did not respect any laws except their own code of ethics. These maritime outlaws embrace Lucifer, the most rebellious of the angels. They die as they lived, showing no signs of repenting. Piracy might be seen as a good life, but not a long one. Their lives, impetuous, dangerous, and short, were a product of a war declared against all land, and an undeclared war against merchant boat captains and royals. We essentially like pirates because they were rebels. They defy, in one way or another, the conventions of class, race, and nationality. They were poor and lived meagerly but with grand ideals. Exploited and often abused by merchant captains, they established a different discipline, practicing their own democracy and equality, and creating an alternative method of navigating ships. Every generation should have its own rebels and pirates, agitated and audacious, breaking stereotypes and moving forward.

Telescopium Constellation

The Telescopium timepiece symbolises the movement of the dial of the watch to the infinity, thus making it disappear in the night sky. The diamonds set between ice sapphires represent the constellation of the Great Bear. This constellation guided the captains of the vessels during the night. Quinting pays homage symbolically. About the creation Pascal Berclaz, President of Quinting, said: “A dream that combines glamorous star and the spirit of the factory, the Telescopium is a meeting point with fine jewellery, between the Swiss watch-making art and technology to the level of art”.

Diamond Baguettes Pure Luxury

Sumptuous and sparkling, this version of Quinting chronograph is intended for those who have the desire to seduce, an instinct of domination and who are on a continued quest for pleasure. These watches are not intended to peek out discreetly from under a cuff, impossible to ignore for both observer and wearer.

We wear what we love and the watch we choose to wear is a reflection of the way we want to be seen. Quinting's QGLBS is a yellow gold case, set with baguette diamonds and a mechanism created by sapphire for the transparent movement. QWGLBR is a white gold case, set with baguette diamonds and rubies 7,66 carats.

Arabesque Perpetual Art

The arabesque is a model reflecting the race of time through an arabesque perpetually changing its shape with the passing of seconds, minutes and hours. Every second, a new ephemeral draft appears, drawing some figures in perpetual movement. Three different arabesques have been engraved on three mobile sapphires. Brightness of sun or shadow of night, brilliance of steel or luminance of gold, Quinting created the model in two versions, the first in gold, the second in steel.

Advance More than a Tourbillon

Breguet created the Tourbillon for the Pocket watch; it compensates the effects of Earth's gravity. For the Wrist watch Quinting developed the Cyclone, which in addition to compensating the effects of gravity, compensates all synergy effects induced by the movements of the wrist.

The Cyclone system has two movements turning in opposite directions, the wheels of the seconds turn in the direction of the second hand while some other wheels rotate in the opposite direction. Thus, if some wheels accelerate, the other ones decelerate and thanks to the mysterious system of Quinting, the forces will be compensated, not only the ones of gravity, but also the strong ones which are created by the rough movement of the wrist. Notwithstanding the significant improvement of the accuracy of watches, this system eliminates the internal stresses of the watch, possible collision, thereby avoiding sending the watch for repair. Today, Quinting watches are the only wristwatches which own a mechanism capable of compensating the effects of synergy and cancelling the working gaps of the mechanism.

Zodiac Collection

Out of sight and on our mind

Skies have always been visible to the naked eyes. However, before Galileo's first telescope in 1609, the celestial movements remained quite mysterious. That is why humans, stuck between the solid disorder of the earth and the unachievable immensity of the sky, always provide to it much more than they received.

In this twelfth year of the third millennium, Quinting revisits the twelve Zodiac signs. Celestial symbols par excellence, they are a proof that an order, even unstable, exists. That we can believe in a balance between the very small and the very big capable to restore human identity within cosmos.

With its Zodiac Collection, Quinting launches twelve different models, one for each sign of the Zodiac (Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius, and Pisces). As with the Telescopium model (showing the Big Bear), diamonds, hand-crimped on the sapphires, here symbolize the stars of each constellation.

Tanks to the grace carried by a Quinting watch of the Zodiac Collection, the one who wears it can realize that he can find his own balance at hand, just waiting for him to master his destiny.

Hypnose Collection Showing the Invisible

In 2012, Quinting keeps innovating. After amazing the previous decade with the purity of its 100% see-through pieces, the brand now goes further on the path taken by its limited editions and the Art Collection to make the invisible visible.

The Hypnose Collection takes up Quinting's most famous models and gives them a second life by substituting some sapphires by discs in polished surgical steel, in their natural color or painted. Associating steel's urban side and sapphire nobility, the metal discs breathe a dynamic and young spirit into the pieces.

Each piece of the Hypnose Collection keeps all the mystery of transparency while showing the internal movement. Then the animation is infinitely modifiable and customizable thanks to the third dimension that Quinting only can give with the different layers we can decide to show or not. Certain pieces contain discs rotating at the speed of the hour and the minute, others at the speed of second and false second (anticlockwise).

Mystic Hypnose Cigar Cutter

The cigar cutter is the first born of the Hypnose Collection. The two discs, strictly identical, represent a sharpened five-pointed star. The first one is rotating at the speed of hours and the second one, on the other side, at the speed of minutes.

Over time and the rotation of the two discs, both stars become closer until they cross. Then the one who wears it can see on his wrist the mechanism of five cigar cutters perfectly synchronized with a perpetual movement.

The stage when the cigar isn't lighted yet, when you put it out of its case, smell it and finally cut it, this step is certainly as important in the pleasure taken than the one when you smoke it. Conscious of the magical power of this discovery ritual, each cigar lover will be captivated by the slow process of the most precise of the double guillotines.

Art Collection

Quinting introduces you to its Art Collection, one that consists solely of unique pieces. Quinting's 100% transparent watches with a layered sapphire movement are a blank canvas for original art. With our artis' skills and creativity we were able to create hand painted, stunning one-o-a-kind pieces. Enames used on Quinting watches provides a different effect than when used on any other. Our watches have internal discs made of sapphire, eternal as diamonds. The paintings last forever, similar to stained glass one may find in the oldest cathedrals, but all the more durable. Each unique watch frames an original work of art. The paintings were made using the finest materials. A steady hand, a special paint brush and high quality enamel paint give a colorful new life to these Quinting watches.

When Quinting's artists put their imaginations to work, they can create any one of a kind piece; the following watches are just a few examples of all the possibilities.

The Moonlight Watchmaking Revolution

Quinting continues to WOW the watchmaking community with firsts: the first and only transparent watch, the first and only watch with a sapphire movement, the first and only watch with counterbalancing forces. Now Quinting releases yet another first: The Moonlight. Quinting created a movement exclusively for this watch, the only «true» moon phase watch. It is the first in the world where the moon revolves around the earth, accurately showing its phases. Meanwhile, every hour a comet shoots around the earth and the moon, always ready to be wished upon. This limited edition is composed of 360 pieces, representing the 360 degrees of the earth. Each piece will have a different view of the earth, painted by hand with enamel.

Unique Piece

Movement Quinting Tech-6
(Quinting Tech-5 basis with 8
sapphire discs).

Position of paintings

- Moon on modified date sapphire
- Shooting star on minute sapphire
- Earth on intermediate fixed sapphire

The Cherry Blossom Feminine Power

Two animated birds fly around a cherry blossom in bloom, These exotic birds naturally find their place in paradise on earth among the beautiful blossoms of a cherry tree.

Within Asian culture cherry blossoms represent feminine power and beauty. Wearing this watch enforces the embodiment of these traits.

Unique Piece

Movement Quinting Tech-5

Position of paintings

- Yellow bird on hour sapphire
- Blue bird on minute sapphire
- Cherry blossom tree on fixed base sapphire

The Polo Player Phosphorescence

The Polo Player is the first timepiece we used our custom-made phosphorescent pigment on. This first, created especially by Quinting, is the fruit of an advanced study. The result is a luminescent masterpiece that perpetually glows.

The mallet turns at the speed of the minute hand, enabling the polo player to race through time and hit the ball once an hour.

Unique Piece

Movement Quinting Tech-5

Position of paintings

- Horse and player on stationary disc
- Mallet on minute disc
- Ball on hour disc

The Koi Fish The Five Senses

Five bright Koi fish lively swim around this watch. Koi are willful fish that swim upstream, they are even said to climb waterfalls.

Perseverance, determination, and power drive the one who wears this watch to greatness. In this watch, these fish never stop swimming, moving forward with the passage of time.

Unique Piece

Movement Quinting Tech-5

Position of paintings

- 3 white and red fish on hour sapphire
- 2 red fish on minute sapphire

Gold Art Collection

Midas' Hand

As an extension of the Art Collection, Quinting launches, especially for Baselworld 2012, its Gold Art Collection. Still based on the exclusive realization of unique pieces hand painted with enamel, the Gold Art Collection magnifies the paintings with gold inserts both accurate and delicate.

Noble and precious material, gold is the most malleable and ductile metal in the world. Its resistance allows the most technical distortions and the finest ornaments. Assimilated to solar power from prehistory, gold has always been a symbol of power and fortune.

From Tutankhamun's burial mask (ancient Egypt) to its special place in our modern monetary system, gold never stopped to stake Human life. Today, Quinting re-appropriates its values by substituting the enamel used for the Art pieces with enameled gold.

Then each piece, unique and hand painted, devotes itself to write a new page in the precious History of this metal, conferring on the one who wears it the power of a modern-day Midas, able to turn everything he touches... in gold.

Cherry Blossom Gold
Q5PGL51GCherryblossom
Pink Gold 18 ct
Unique Timepiece

Step One Back to Basics

This drop of gold, heated at 1'064,18°C (1'948°F), will give birth to Cherry Trees, Koi Fish, flying birds and other mystic Water Dragons. Once melted the drop of raw gold gets cold and turns darker until immersed in sulphuric acid. When the gold raw is golden again starts the rolling process. It will pass again and again between rolls bringing closer each time.

Gold Art: Three gold koifish
swimming inside, hand enameled

Step Two Reinventing Materials

At the last step of lamination, the gold leaf is only the thickness of two sheets of paper. It is now time to draw the motif, here a bird, directly on the gold leaf, by hand. Once done, the gold leaf is sawed with high precision... to give birth to a gold bird!

White Dial

Gold Art: Cherry Blossom with two
birds flying on the hour and minute
sapphires, hand enameled

Step Three

The Miracle of Life

The biggest challenge is now to give volume to a two tenth millimetres thick bird. Other precious materials such as wood or, here, black Mother-of-pearl of the Southern Seas can also be worked for the ornaments. Finally, the sculpted gold motives are hand decorated with enamel and fixed on the sapphire.

minutes, hand enameled

Street Art Collection

High Street Art

What if subversion wasn't in the streets anymore but on the wrist of enlightened souls? When Quinting first launched its Street Art Collection, graffiti still was an underground art only saw on your neighborhood's walls. A few months later, the biggest world-famous brands successfully blend luxury, fashion and street art.

With the Street Art Collection, Quinting does not only pick some popular designs but creates unseen motifs directly coming from the brain of its exclusive artists. All the models are unique pieces, hand-decorated with enamel and involve four different scenery pieces, two fixed, one turning at the speed of hours and one at the speed of minutes. Another step in the astonishing kinetic art dear to Quinting!

Each watch within the Street Art Collection is sold with exclusive paintings on canvas and the watch box. All three pieces create together a real work of art, a coherent whole different for each watch. All the designs comport superluminova elements to create different motifs day and night, just as the different faces of a street the day or at night.

Unique Timepiece

China - Tianjin Binjiang Dao

World's most populous country, multi-faceted bubbling nation, China is undoubtedly one of the most fascinating countries to explore. Tianjin is an absolute must if you are planning to visit the area. With its status of Direct-controlled municipality of the People's Republic of China, Tianjin is the biggest coastal town and also the most important urban area in Mainland China.

Binjiang Dao is certainly one of the most fascinating streets in town, the one you will not miss to stroll in if you feel like shopping in both local shops and major international brand names. A senses and cultural melting pot you will be proud to incarnate by wearing this timekeeper on your wrist.

USA - Washington Pennsylvania Avenue

The fifty stars country, as much as its states, as much as the different dreams you can expect to realize when you arrive there. This watch of the Quinting Street Art Collection pays tribute to the Federal Capital of the United States of America, Washington, and more specifically to the Pennsylvania Avenue.

Thomas Jefferson, Abraham Lincoln, John F. Kennedy or even Bill Clinton daily stepped its ground during their two years as President; Martin Luther King wrote his famous "I have a dream" there. Place steeped in history and symbols, its miniaturization within this Quinting timekeeper will show to the world the defender of piece and the patriot inside you.

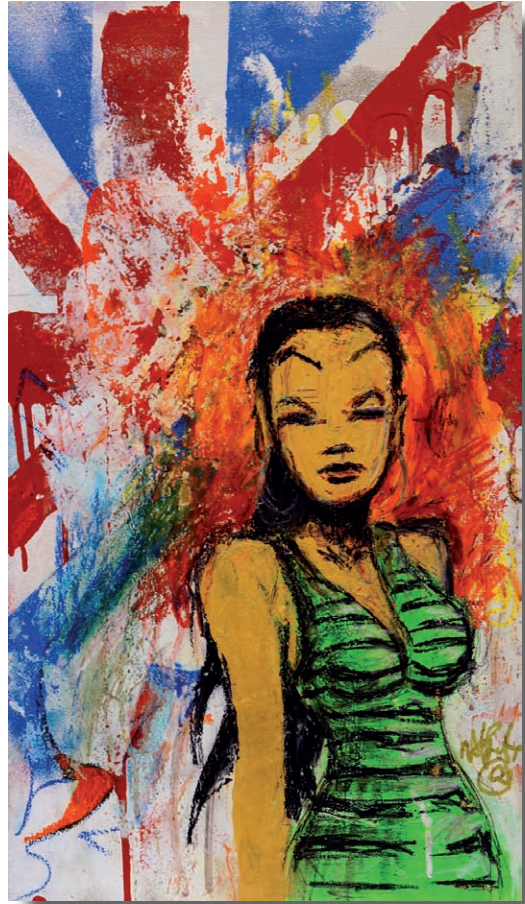

United Kingdom - London Oxford Street

Nothing less than the longer commercial street in the world! With its one and a half miles long and its few 300 shops, Oxford Street undoubtedly deserves its nickname of the “English Champs-Élysées”. Exit at Marble Arch and let loose as the street takes you until Oxford Circus and then Tottenham Court Rd, the opportunity to get some rest in a pub in Soho after a long shopping day.

This Quinting timekeeper is anything like the street it represents: both young and trendy, feminine and full of life. It will let you show all your facets, as the mobile settings inside your watch will leave the world discover all the effervescence of this international street, in daylight as well as at night, thanks to Quinting very special phosphorescent pigment able to let appear during your nightlife what no one could suspect on daylight.

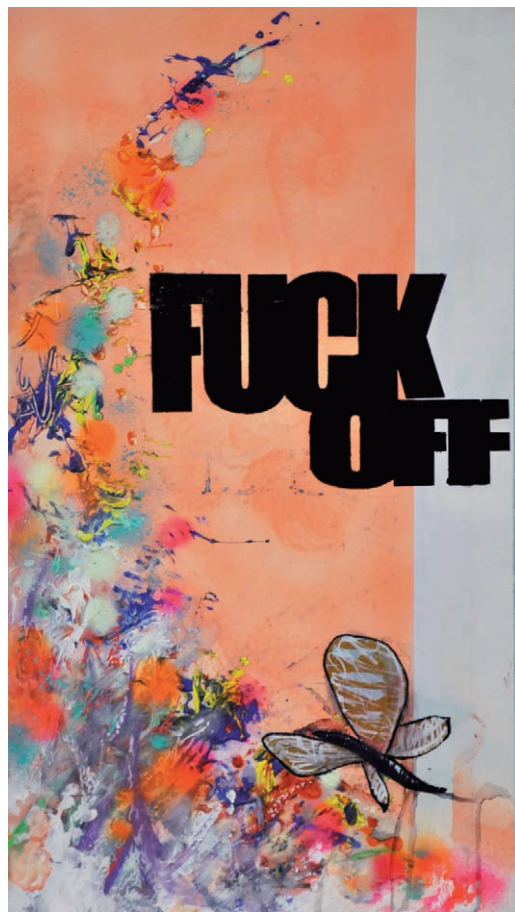

USA - New York 6th Avenue

The fifty stars country, as much as its states, as much as the different dreams you can expect to realize when you arrive there. This watch of the Quinting Street Art Collection pays tribute to the Federal Capital of the United States of America, Washington, and more specifically to the Pennsylvania Avenue.
