Luxury in a pure state

We wear what we love and the watch we choose to wear is a reflection of the way we want to be seen.

Quinting's QGLBS is

A yellow gold case, set with baguette diamonds and a mechanism created by sapphire for the transparent movement

Sumptuous and sparkling, this version of Quinting chronograph is intended for those who have the desire to seduce, an instinct of domination and who are on a continued quest for pleasure. This watch is not intended to peek out discreetly from under a cuff. It is impossible to ignore for both observer and wearer.

This diamond-studded Mysterious Quinting Chronograph with blue sapphire hour markers proves that luxury can not be discreet. The fiery brilliance of precious stones captures our hearts and the totally see-through sapphire movement framed in an 18K gold case expresses the eternal mystery of time. This Quinting chronograph, set in precious stones, is a starry dream that combines glamour with the spirit of the manufacture, “haute horlogerie” with “haute couture” jewellery. Only gems of the best colour, clarity and cut have been selected for this superb watch. Twelve sapphires totalling 0.98 carats bring brilliant flashes of deep blue to the case in yellow gold set with 128 baguette diamonds with a total carat weight of 4.7 carats.

This majestic and mesmerizing creation is not just fashion but something everlasting that will always be in vogue. Unlike other watches, even the most precious with metal movements, this miracle of transparency, featuring a sapphire movement, is the only timepiece in the world that could achieve the highest degree of luxury. Using the finest materials (gold, sapphire, diamonds), Quinting gave a body and a soul to light and transparency and captured them to let them become part of their wearer’s beauty.

It is now time to place a real luxury on your wrist with this timeless and elegant Quinting.

Characteristics

Gems	Number	Carat Reference
Baguette Diamonds (trapezoid)	48	1,86 ref 01/P04 - 1/1

	4	0,05
	4	0,04
	4	0,03
	4	3,00
Total	160	7,66

Diamonds are eternal, as is Quinting

The Greeks of Antiquity believed that diamonds were star dust that had fallen to Earth. Some even said of that they were "the tears of the Gods".

What makes the QGLBS particular is its' diamonds. In fact, this chronograph in its gold case is surrounded by baguette diamonds.

Barely 20% of the worldwide production of brut diamonds is intended for jewellery (gemneous quality) and 80% to industrial uses. There are more than 5'000 classifications possible for brut diamonds. The diamonds that serve in jewellery are thoroughly selected. They must have the best colour and the highest purity. When choosing a diamond, we take into account the size, colour, purity, and the final cut.

A well cut diamond will reflect the light from one facet to another and will disperse it. If the diamond is cut well, it will have an optimal brightness. Its weight is expressed in carats, one carat is equal to 0,20 grams.

Diamonds with few or no inclusions are very rare and due to this, they cost a lot. These inclusions can look like crystals, clouds or tiny feathers. International norms established that a diamond is said to be « pure » if an expert's eye does not see any faults under a ten times magnification.

Quinting has therefore chosen the best diamonds in order to create the perfect and exceptional jewel that is the QGLBS

QGLBS with Yellow Gold dial, lug with baguette diamonds

Technical Characteristics

The watch is composed sapphire discs which are previously metalized and given an anti-reflection coating. The case and the transparent sapphire movement are engraved with an individual series number.

The case and the buckle are in yellow gold 18kt (750).

Case

Total Height: 14,00 mm

Total Diameter: 43,80 mm

Water Resistance: 50 meters (5 ATM)

Movement

The unique transparent movement is patented.

Diameter: 39,00 mm

Total Height: 8,60 mm

Number of sapphire layers: 11 sapphire discs perfectly parallel

Guarantee: 2 years

Through the looking glass

When you see the watchmaking of the future, with the introduction of digital tools, the impression is that the watch is not just a timepiece, but a piece of art. It is a work of art that is created by the hands of a watchmaker, who has spent years of his life learning the art of watchmaking. The watch is not just a piece of metal and leather, but a piece of art that is created by the hands of a watchmaker, who has spent years of his life learning the art of watchmaking.
